COMPANY PROFILE

Lutfabad Mango Farm, located in the heart of Multan, Punjab, is a leading grower and processor of premium Pakistani mangoes renowned for their exceptional sweetness, aroma, and texture. With a legacy rooted in agricultural excellence, the farm is committed to adopting modern orchard management and export-compliant post-harvest practices to ensure that every mango meets international quality standards.

To meet export market requirements, the farm has established a state-of-the-art Hot Water Treatment (HWT) Facility approved by relevant quarantine and export authorities—to ensure phytosanitary compliance for shipments to Europe, the Middle East, and Far East markets. The facility features automatic temperature-controlled tanks, grading and sorting lines, and hygienic packing stations designed to preserve the natural quality and shelf life of mangoes.

Lutfabad Mango Farm's HWT unit not only processes its own produce but also provides treatment and packaging services to regional growers and exporters, strengthening the mango value chain in South Punjab. The facility operates under HACCP and ISO 22000 food safety systems, ensuring traceability and compliance with global export protocols.
