## COMPANY PROFILE

Universal Farm is a pioneering agribusiness enterprise from Balochistan, committed to producing, processing, and marketing premium-quality organic spices, condiments, and dry fruits. Established with a mission to promote the province's natural Agri-Resources on both national and international platforms, Universal Farm has become a trusted name for authenticity, purity, and quality in the organic food sector.

Nestled in the fertile valleys and arid highlands of Balochistan, the company works closely with local growers to cultivate a diverse range of organic crops, including cumin, coriander, fennel, red chilies, turmeric, black pepper, and dried herbs, as well as almonds, pistachios, walnuts, and raisins. All products are grown without synthetic fertilizers or pesticides, following organic and Good Agricultural Practices (GAP) to preserve natural flavor and nutritional value. With growing demand for healthy, chemical-free food, Universal Farm focuses on value addition, branding, and eco-friendly packaging to enhance competitiveness in export markets across the Middle East, Europe, and South Asia. The company's strong backward linkages with farmers ensure fair trade practices, community empowerment, and steady rural income generation.
